

All your project data, wherever your team needs it.

With Autodesk Construction Cloud, concrete contractors work more productively, every day.

Built for the field

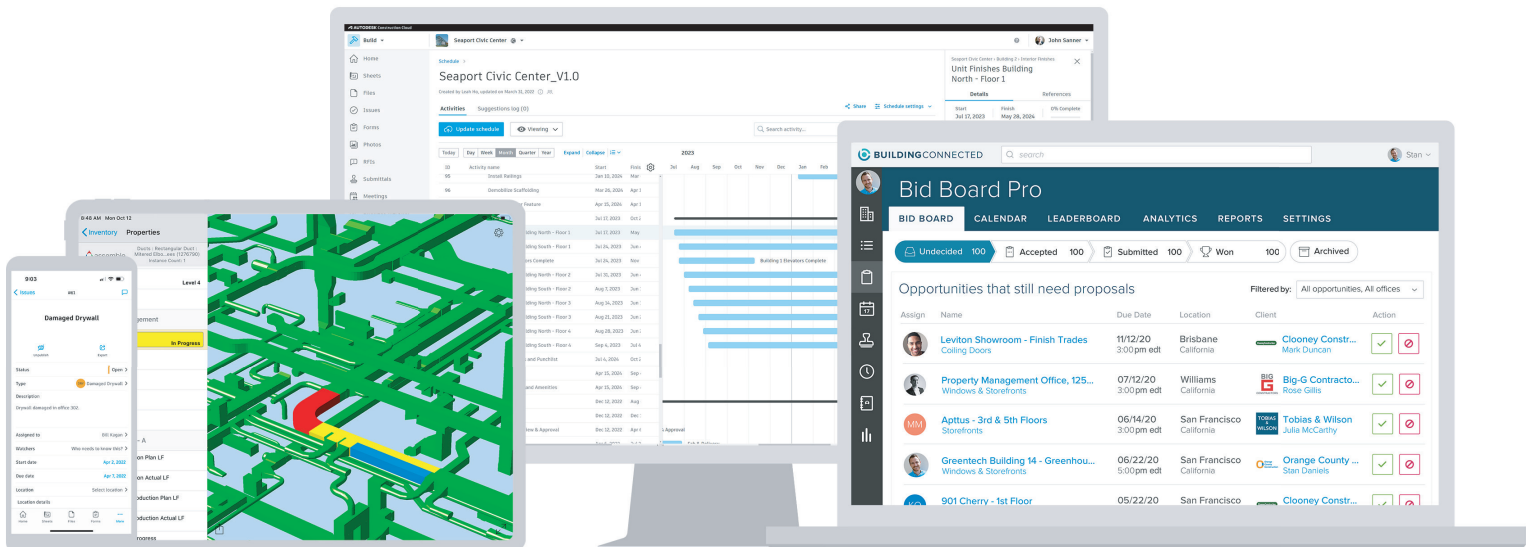

Give your field teams a mobile tool they'll want to use.

Easy to use

Simple to learn, for all team members.

Reduce project risk

Keep your team working from current project information to reduce your risk.

FIELD COLLABORATION

Unify the entire project team on the current plan set, with access to all project information.

BID MANAGEMENT

Keep track of bid invites, stay ahead of deadlines and measure the success of won business.

DOCUMENT MANAGEMENT

Keep all project data, from design to operations, in a single environment to access from anywhere.

COMMISSIONING

Deliver efficient and organized documentation to satisfy clients and position your firm for future work.

12%

time savings in project delivery

BN Electrical

50%

time savings in earned value tracking

McKinstry

13%

cost savings on materials

Cannistraro

“The biggest benefit of Autodesk Build is creating consistency across all projects. We have more transparency to see what’s working and where we can improve. The data we’re gaining from Autodesk Build is invaluable and will help us be more competitive as we scale and win new work.”

Alvida Surpia-Jones
